

## **USS Partners with Keonn to Expand RFID System Offerings**

**RANCHO CUCAMONGA, Calif. (June 23, 2017)** – USS, leader in product protection and security technology, known for its innovations within the loss prevention industry, recently announced the expansion of its electronic article surveillance (EAS) system integration capabilities and offerings to include radio-frequency identification (RFID) technology; made possible through a new partnership with RFID hardware and software manufacturer, Keonn.

Spanish-headquartered, Keonn specializes in solution providers and system integrators partnerships to provide industries, such as retail and healthcare, customized RFID system solutions accompanied by trusted installation, integration and maintenance services.

USS Chief Technology Officer Robert Simoneau voiced his excitement for the new partnership and technology capabilities, and the possibilities they present for USS' product development teams.

"This an incredible opportunity for USS to drastically expand our technology and product catalogue," explained Simoneau. "RFID technology is the way of the future," he continued. "In addition to increasing more-revealing detection, it allows users to better track people and inventory, resulting in safer and more efficient environments. This new partnership helps to remove some of the limitations that we had experienced with our previous RFID product portfolio and will enable us to provide the most comprehensive offering in the industry."

"By leveraging a partnership with a like-minded, innovation-driven, organization like Keonn, we can combine our technologies to develop state-of-the art products that will meet clients' unique needs not only now, but well into the foreseeable future."
