<u>ZKACCESS PROVES THE POWER OF PARTNERSHIPS</u>
Fairfield, NJ . . .March, 2016

Technology partnerships and product integration are quickly reshaping the scope of security solutions in the marketplace. ZKAccess, a leading provider of biometric and RFID security solutions, is forging numerous integration offerings and proving how powerful meaningful technology partnerships can be. ZKAccess has teamed up with several industry leaders, including Lenel, Amag, RS2, and Schneider-Electric to provide advanced integrated biometric solutions.

ZKAccess' ZKBioPack software now allows for the integration of ZKAccess biometric readers with RS2 Technology's Access IT! access control software. RS2 Technologies customers can launch the ZKBioPack software application from within their *Access It!* software interface and Schneider Electric customers can also launch the ZKBioPack software application from within their *Continuum* software interface when ZKAccess IP-based biometric readers are added.

Supported ZKAccess biometric models for both the RS2 and Schneider Electric integrations include the F18 indoor fingerprint reader, the TF1700 & TF1600 outdoor fingerprint readers, and the MB700 multi-biometric fingerprint and face reader. ZKAccess biometric readers have the very same power, wiring and communication requirements as do any other third party readers, making ZKAccess hardware easy to install. With the introduction of ZKBioPack, enrolling users' fingerprints is now equally simple.

Additionally, the ZKAccess OP200 fingerprint-based access control reader was designed to integrate directly with Lenel OnGuard and AMAG Symmetry software without needing middleware. The integration enables very fast bi-directional communication with the OP200, and enrolling users' fingerprints is quick and easy.

"Enterprise integrators are demanding improved physical security solutions that are integrated, scalable, easy to use and affordable," states Larry Reed, CEO, ZKAccess. "There are so many vulnerable access points within buildings and parking lots and increasingly more customers are looking to the heightened security that only biometrics provides," he adds. "Our technology partnerships with industry leaders such as Schneider Electric, RS2, AMAG and Lenel allow us an unprecedented opportunity to bring affordable biometric security to their customers all over the world."

About ZKAccess: ZKAccess is a leading provider of biometric (fingerprint and/or face) and RFID solutions. Product offerings include Access Control readers and panels, Near & Far-range Facial Recognition Cameras, Elevator/floor access controllers, IP and AHD cameras, and Turnstiles and Consumer products including fingerprint-based battery-operated Biometric Door Locks. Its solutions are multi-lingual and localized in over 18 different languages. ZKAccess designs specialized products for specific markets and provides local customer support to its North American customers. Its U.S. facility

includes a large global showroom and warehouse. Based in Fairfield, NJ, ZKAccess is a division of ZKTeco, a leading global developer of security and time management solutions. ZKAccess is synonymous with technical innovation, quality, speed-to-market and reliability. For more information, please visit http://www.zkaccess.com/
